IKUSI PROVIDES
EFFICIENT AND ROBUST
COMMUNICATIONS
NETWORKS

Iñaki Maiz
Ikusi CEO

As experts in **communications and cybersecurity infrastructures**, Ikusi has specialized in converting technology into an enabling tool to benefit our clients' businesses.

We combine our technological knowledge with a **client-focused approach, to ensure that we understand their business in depth** and, through a consultative advisory process, to anticipate the technological proposals that will enable them to continue to evolve.

We handle the implementation of a **robust and secure network infrastructure** through which the communications and data flow. An infrastructure in constant evolution, becoming ever more intelligent, that provides companies with **connectivity**, collaboration tools and a layer of **cybersecurity**.

As **telecommunication network experts**, we at Ikusi are always up to date, incorporating into our offer new solutions and architectures from the world's best manufac-

tures: SD-WAN networks, Wi-Fi, SASE, next-generation data centres, cloud security, etc.

Drawing on our experience in network infrastructures, and our proven capacity to integrate technology, we have specialised in providing critical services to clients, have a direct positive impact on their business. It is a great responsibility, but also a great incentive to continue to advance and thus guide the large corporations who have placed their trust in Ikusi.

For this we have a highly qualified, professional and service-minded team. We have carried out multiple projects in major companies in **Mexico, Spain and Colombia**, some of whom have been our clients for more than 20 years now.

IKUSI IS PART OF VELATIA

VALUES THAT UNITE US

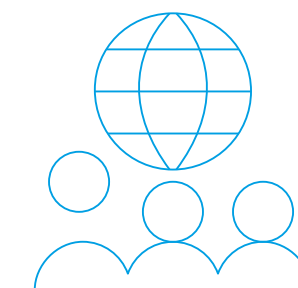

flexibility
innovation
leadership
pragmatism
support

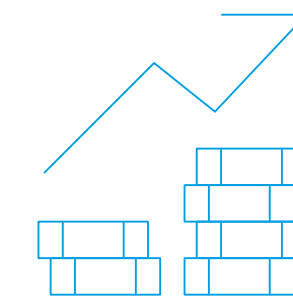

velatia

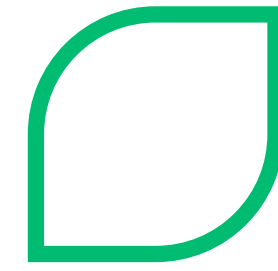

Velatia is an international industrial and technological group that operates in the fields of electrical networks, electronics and communication networks, as well as in the consulting, security and aeronautics sectors, where safety, efficiency and reliability are valued.

OUR ADN

customization
 commitment
 innovation
 specialization

Ikusi deploys integration, engineering and technological development services development services for the digital transformation of businesses. It works together with clients to understand the peculiarities of their business and, from there and, from there, to make it evolve using the full potential of technology and using the full potential of technology and associated services.

IKUSI SMART EXPERIENCE

Ikusi is a technology services company, specialized in communications infrastructures, data centers, collaboration tools and cybersecurity.

DIGITAL TRANSFORMATION OF SECTORS

Comprehensive capabilities

Network availability and visibility

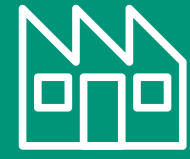

We offer our clients a **solid, robust, scalable and secure network infrastructure** on which to base solutions and services for improved, more efficient critical processes.

Our clients operate in highly competitive sectors such as retail, industry and finance, that constantly need to create value. This is why we are always vigilant, studying the technological proposals of manufacturers and new architectures to know **which technological solution is the most appropriate for each client.**

We have an in-depth knowledge of the business priorities and needs of these clients, which allows us to advise them and to determine where, when and how technology can bring value to their business.

With the **Ikusi ONCE** centre, from where more than 100 highly-qualified engineers monitor, support and manage the clients' network infrastructure to ensure the operational continuity of their services.

With the **Ikusi Intelligence** platform, that resolves visibility issues and improves the management of new-generation business networks. This platform adds a layer of analytics and business intelligence, so that organizations have executive control of the network resources and services they use, allowing them to make immediate cost-benefit decisions thanks to real-time visibility and impact on the business.

INDUSTRY

Towards smart manufacturing with Ikusi

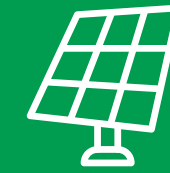

FINANCIAL

We turn technology into a critical business asset for banks and insurance companies

RETAIL

From data analytics to better user, customer and value chain experience

ENERGY

Transforming the value chain of energy companies through digitization

INFRASTRUCTURE OPERATORS

Specialized operational solutions and a dual layer of physical security and cybersecurity

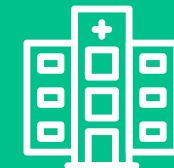

SERVICES

Connectivity, collaboration and security for new work models

PUBLIC ADMINISTRATION

We deploy robust, secure and intelligent networks for new digital services

HEALTHCARE

The latest generation of smart grids for the digitization of the healthcare sector

SERVICE PROVIDERS

Technology for core service providers to innovate and optimize the way they deliver their services

EDUCATION

Connectivity and cybersecurity for innovative education

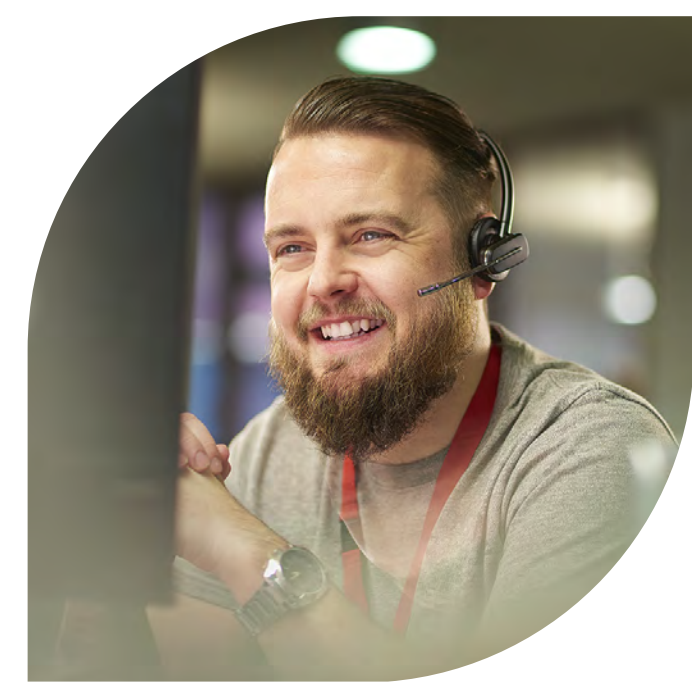

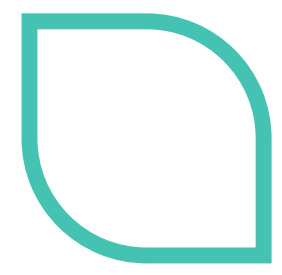

Our technology-based projects

SECTORS

At Ikusi we deploy services and solutions to streamline operations, boost profitability and streamline operations, boost profitability and sustainability multiple strategic sectors.

CYBERSECURITY

Integral cybersecurity for networks and applications

COMMUNICATION INFRASTRUCTURE

Tailored, secure and easy-to-deploy connectivity

PHYSICAL SECURITY

Unified security projects for infrastructures

INTERNET OF THINGS (IoT)

From data analysis to business intelligence

DATA ANALYTICS AND EXPLOITATION

Data-driven process and application development and improvement

COLLABORATION

Unified communications as a service, ensuring better utilization of network resources

DATA CENTERS

Intelligent, scalable and easily scalable infrastructures

Technology for customized digitalization

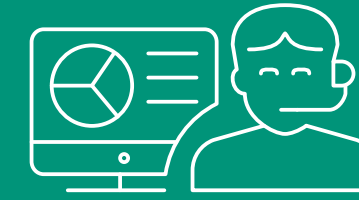

TECHNOLOGICAL OFFERING

At Ikusi we have a state-of-the-art technological proposal and associated services to boost the business of multiple sectors through digitalization.

TAILORED SERVICES

Ikusi has developed a series of specialized services and monitoring centers to lead organizations to digital transformation in a secure and optimized way.

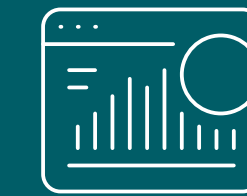

We seek to cover all aspects related to information technologies, collaboration, cybersecurity, networks and IT for organizations.

MANAGED SERVICES

We take care of the continuity of your business, you take care of conquer the market

We lead organizations to digital transformation

CUSTOMER EXPERIENCE

Ensures the adoption of technology to export them to the maximum and obtain business results in a shorter time and with defined objectives

ON-DEMAND SERVICES

Growing has never been as easy as it is as it is with on-demand services.

OUR DIFFERENTIAL VALUE

IKUSI INTELLIGENCE

A portal that provides a global vision of the continuity of network services, security systems, information technologies, network infrastructure automation systems and business intelligence systems.

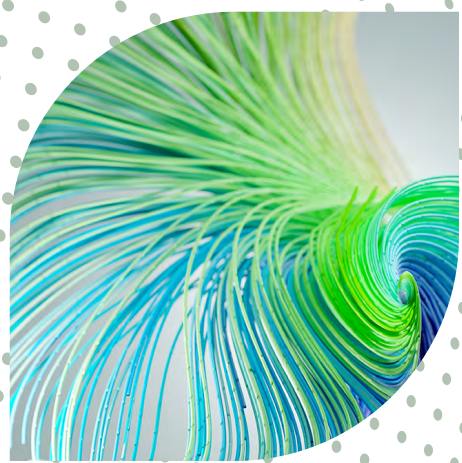

IKUSI ONCE

Our unified operations center that is responsible for monitoring, support and proactive management of network, cybersecurity and IT infrastructures.
