

invisible technology,
visible transformation

We are a technology services company specializing in communications infrastructure and cybersecurity

Ikusi is a Velatia company. Velatia is an international family-owned industrial and technology group that operates in the fields of power grids, electronics, and communications networks.

The networks we design and deploy form the foundation of the solutions and services that make critical business processes more efficient for organizations operating in highly competitive industries.

In addition to this specialization, we bring extensive experience in flexible managed IT services tailored to each client's needs, as well as technology modernization projects in areas such as **enterprise networking, data centers and cloud, observability, cybersecurity, and collaboration.**

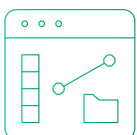

€190 MILLION IN REVENUE

Our Differentiating Value

Observability Services

Simplified, real-time network management that breaks down information silos by connecting all technology layers: networking, data center, cloud, and cybersecurity.

Ikusi Intelligence

An observability and advanced analytics solution that provides visibility into the health of networks, services, and applications through automated, real-time executive reporting.

Ikusi ONCE, A Unified and Strategic Operations Center.

A unique operations center that consolidates four operational areas into a single hub: network operations, collaboration, cybersecurity, and cloud operations.

Customer Experience

A technology adoption service combining data analysis, continuous listening, and advanced methodologies to drive business success. It analyzes application usage and time spent on digital tools to identify improvement opportunities, address inefficiencies, and optimize technology adoption and performance.

Personal Commitment and Advanced Expertise

- **Top-level specialization and certifications** that transform technological complexity into business value.
- The certifications held by our professionals reflect the **high level of technical expertise and commitment to excellence** that define Ikusi. This specialized knowledge enables us to manage critical areas of our customers' operations and positions us as a leading provider of managed services.
- Particularly noteworthy is our **high number of CCIE** (Cisco Certified Internetwork Expert) certifications—one of the industry's most prestigious credentials and a testament to our ability to design, deploy, and operate complex, large-scale network infrastructures.
